OBJECTIVE

Fourth-year Bachelor of Industrial Technology student major in Computer Technology, seeking an internship in any IT field in Manila or Pampanga. Has hands-on experience in web development and Android app development, with a growing interest in web design. Eager to learn, contribute, and build skills through real-world projects and teams.

EDUCATION

Bulacan State University Expected Graduation: 2027

Bachelor of Industrial Technology, major in Computer Technology (4th Year)

- Dean's Lister: 2nd Year and 3rd Year

PROJECTS

Capstone: Customizable Android Learning Application for Kindergarten Pupils

Malolos Christian School (MCS)

- Designed and developed a customizable, native Android application that works offline, built to improve engagement and foundational skills of kindergarten pupils.
- Built using Android Studio and Kotlin. Demo available upon request.

Offgrid: Photobooth Website offgrid-b.vercel.app

- Created a simple photobooth website using HTML and CSS.

Weather Application Computer Programming 4

- Built a weather application with classmates as the final project for Computer Programming 4.

DESIGN PORTFOLIO (FIGMA)

- **BULSU Site Redesign** – Redesigned the Bulacan State University website as an activity for IIDD, giving it a cleaner and more user-friendly look.
- **LearnHive** – Wireframe of our capstone project, the customizable offline Android learning app for kindergarten pupils.
- **IIDD Final Project** – Designed a user interface for a computer laboratory system as the final project for IIDD 1.
- **IIDD Activity** – My first app redesign, a fresh take on the Instagram app, done as an activity for IIDD 1.
- **IIDD II Activity 1** – Redesigned another app as an activity for IIDD II, building on my first redesign experience.

EXPERIENCE

Service Crew, McDonald's 2026

Special Program for the Employment of Students (SPES)

- Maintained a clean and sanitized dining area by promptly bussing tables, sweeping, and mopping floors to ensure a pleasant customer experience.
- Prepared food ingredients according to quality and safety standards.

Data Encoder, Municipal Agriculture Office 2023

Work Immersion

- Accurately encoded farmers' names and voucher details into the system.
- Ensured data integrity and completeness for proper record-keeping.

SKILLS

Web & Design: HTML/CSS, Figma

Programming: C++, Kotlin (Jetpack Compose), Python, SQL

Hardware & Electronics: Arduino/ESP32, Basic Computer Hardware and Software Troubleshooting

Tools: Microsoft Office, phpMyAdmin, Visual Studio Code, Android Studio, Firebase

Soft Skills: Communication, Teamwork, Organization, Time Management

Languages: English, Filipino

CERTIFICATIONS

SQL Intermediate – Sololearn October 2025

Introduction to SQL – Sololearn August 2025

Introduction to C++ – Sololearn March 2025
